Github: github.com/CodyYuill

Full stack web developer using knowledge of game development to create mobile first environments largely focused on UI/UX. Recently earned a certificate in full stack development from Carleton University, with skills in JavaScript, CSS, API's, Database's and responsive web design. With each new project strives to write clean understandable code while focusing on creating a good UX. Looks forward to applying their skills to a quality-driven team to create engaging and memorable experiences on the web.

EXPERIENCE

Flightless Bees Student Dev Team

2019-2020

Game Programmer

Ottawa, ON

Developed and designed a video game in an agile environment with a group of 10 students

Key Accomplishments:

- Designed and developed two different enemies with their own AI using tools created by the project lead
- Implemented all character animations along side the projects art lead
- Aided programmer lead in QA testing ensuring all mechanics continue to work as expected

McDonalds

2017-2020

Team leader

Kanata, ON

Served customers from all areas of the world in a high-paced, high-energy fast-food environment

Key Accomplishments:

- Satisfied an average of four-hundred guests a day
- Coordinated with all areas of the restaurant to ensure correct food and drink deliveries in a timely fashion
- Promoted to crew trainer after 8 months
- Advanced to team leader 10 months after crew trainer promotion
- Trained new crew members on all company policies and procedures, ensuring daily expectations were met and customers were treated properly
